Art Unit: 1754

The following is an examiner's statement of reasons for allowance: Jacobsen (US 6,479,027) discloses a process for the preparation of ammonia from ammonia synthesis gas by contacting the synthesis gas under ammonia forming conditions with a catalyst comprising ruthenium as the active catalytic material supported on a carrier of boron nitride and/or silicon nitride. However there is no teaching, disclosure or suggestion in Jacobsen to provide such catalyst on a secondary support, as required by applicant's claims. Nor would there be any motivation from the prior art to provide the catalyst of Jacobsen on a secondary support. It is common knowledge that the art of catalysis is highly unpredictable. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
